

DISCLOSURE OF TRANSFERS OF VALUE TO RECIPIENTS IN THE UNITED KINGDOM IN 2016

METHODOLOGICAL NOTE

General summary

In line with pharmaceutical industry practice, Octapharma Limited documents and declares transfers of value made to health professionals, other relevant decision makers, and health organisations in the UK. Details of transfers to recipients in the UK in the calendar year 2016 are provided at the central platform for disclosure provided by the Association of the British Pharmaceutical Industry (ABPI).

Recognition methodologies applied

Transfers of value qualifying for disclosure are identified during a payment review process. Each transfer of value is allocated to one of the value categories defined by the ABPI.

Indirect transfers of value to an individual via an organisation are allocated to the individual if the identity of the individual is known. If the identity of an individual is not known, the transfer is allocated to the organisation.

If the identity of an individual cannot be disclosed for legal reasons, the transfer of value is instead disclosed as part of an anonymised aggregate figure. The number of individuals within the aggregate is also disclosed, together with the percentage of all recipients that they represent.

Transfers of value for research and development made to individuals and organisations are disclosed as part of an anonymised aggregate figure for research and development.

Consent to disclose on a named basis

Each time an individual receives a transfer of value from Octapharma, a document is issued to them detailing the transfer and requesting confirmation of whether or not they consent to being named publicly as the recipient. If an individual does not consent, their transfer of value is disclosed as part of the anonymised aggregate figure.

Non-monetary transfers of value

Disclosure of non-monetary transfers are estimates of the equivalent value in monetary terms.

Multi-year contracts

Transfers of value are disclosed according to the date of transfer from Octapharma. Only value transferred by Octapharma in 2016 appears in the 2016 disclosure information.

Currency and VAT

Where a transfer has been made in a currency other than the Great British Pound (GBP), the GBP equivalent has been determined using the average monthly exchange rate at the date of data preparation. Where VAT is charged, the total amount including VAT is disclosed.

Timing of transfers of value

Following a request for a transfer of value, transfers are made according to the usual practices of Octapharma's Finance Department.

Date of Preparation: 29 March 2017
