

Guerbet Methodology for ABPI Disclosure 2017

With respect to the ABPI code of practice and its implementation of the new clause “24: Transfers of Value to Health Professionals and Healthcare Organisations” in the UK, Guerbet Laboratories Ltd have proceeded to disclosure of all transfers of value in the public site of the country.

Clause 24.1 of the ABPI code states; Companies must document and publicly disclose certain transfers of value made directly or indirectly to health professionals and healthcare organisations located in Europe. Please refer to the ABPI code of practice for the further details on the disclosure clause.

Individual disclosure: the transfers of value to individual named Healthcare Professionals (HCPs) and Healthcare Organisations (HCO’s)

Aggregate disclosure: the transfers of value to HCPs who cannot be named with the exception of transfers of value to HCP’s and HCO’s in connection with certain Research and development (R&D) activities including clinical trials.

The Process

A contract was devised and was sent to the relevant HCPs/HCOs/ORDMs detailing the process of transfers of value (this included the consent form for preference of disclosure). Once the forms were received back the information was entered onto the ABPI template. All payments were made exclusive of tax. In places where the payment details were received in euros the exchange was converted to pounds via XE converter.

Individual disclosure of HCPs and ORDM’s

Transfers of value have only been disclosed if the HCPs have signed the contract AND the consent form sent to them.

Aggregate disclosure of HCPs and ORDM’s

In many cases a contract was signed but a consent form was not received. Therefore it was decided that the information would remain in the aggregate contribution section.

The percentage was calculated by the number of aggregate HCPs and total number of HCPs for individual transfers.

HCO's

These have been disclosed as per the ABPI guidance. All HCOs that we have worked with the transfers of value have been disclosed. This includes some sponsorship and grants.

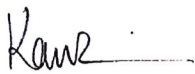

Aggregate Research and Development

These have been disclosed as per the ABPI guidance, as aggregate data.

Many thanks for all the participation. Please inform us if you would like to be added to or removed from the disclosure list.

Kind regards
