

Methodological Note

To identify all transfers of value, all payments made in 2017 by Leadiant Biosciences UK were screened, and those fitting the requirements of transfer of value were included. This was cross-checked against the grants and sponsorship requests included in the compliance approval system.

Consent for disclosure were double checked during the identification and those who confirmed their disclosure in their origin EU country were not included in this sheet. Only payment made in 2017 is included for multi-year contracts and for those using EUROS as final payment currency, the changing ratio to GBP is 1:0.88 in this document.

Two Non-UK consultancy payments in 2017 were disclosed by the company and one of them was disclosed as aggregate per Health Care Professional (HCP) request. There were five grants/sponsorships paid in 2017 to Health Care Organizations (HCOs) based in UK/EU, total amount is £ 31630 (£4350 and €31,000) and VAT exclusive. Grants given to HCOs were for meeting sponsorships and research supports. No payment was given to any HCPs practicing in the UK.
